SUMMARY

Bachelor of Engineering (B.E.) graduate in Information Science and Engineering with strong skills in Python and Object-Oriented Programming, along with hands-on experience developing software projects. Familiar with JavaScript, React.js, Django, SQL, and Firebase, with experience using Git, GitHub, Vercel, and Render for version control and deployment. Quick learner with strong problem-solving abilities, eager to contribute to software development while continuously enhancing technical skills.

SKILLS

Programming Languages: Python, JavaScript

Web Technologies & Frameworks: HTML, CSS, React.js, Django

Databases & Services: SQL, Firebase

Tools & Platforms: Git, GitHub, Vercel, Render

Concepts: Object-Oriented Programming (OOP), REST APIs, Authentication, Deployment

PROJECTS

Cybersecurity Framework for Rural Digital Banking (Final Year Project)

- Developed a secure digital banking platform for rural users with offline transaction support, mobile banking features, and multi-factor authentication.
- Built fraud detection and transaction protection using Machine Learning, JWT authentication, OTP verification, and anomaly detection.
- Integrated blockchain-based transaction auditing to ensure secure, transparent, and tamper-resistant financial transaction records.
- Designed an admin dashboard for fraud monitoring, complaint management, user administration, and transaction oversight.

Heart Disease Prediction Using Machine Learning

- Developed a web-based heart disease prediction system using Python, Flask and machine learning models for real-time risk assessment.
- Implemented Random Forest, SVM, MLP and Neural Network models to predict heart disease based on patient health parameters.
- Built an interactive web interface for patient data input, prediction result visualization, and user-friendly system interaction.
- Designed an admin dashboard for monitoring prediction history, model performance, and overall system analytics.

EXPERIENCE

Python Full Stack Development Intern (Training Program) | QSpiders

Jan 2026 – May 2026

- Gained hands-on experience in Python, Django, HTML, CSS, JavaScript and SQL through full stack development training.
- Developed a full-stack medical inventory management web application with backend development, database integration and authentication features.
- Gained practical exposure to REST API basics, authentication concepts, and application deployment.
- Strengthened problem-solving skills through coding exercises and Data Structures & Algorithms practice in Python.

EDUCATION

Dayananda Sagar College of Engineering, Bengaluru – Bachelor of Engineering in Information Science and Engineering - 2023–2026

Government Polytechnic, Channasandra, Bengaluru – Diploma Computer Science and Engineering - 2020–2023

CERTIFICATIONS

Artificial Intelligence, Online COURSERA Certification.
